

## Build real-time weather information into your business decisions.

From intense lightning to major rainfall to extreme heat, the weather can have a major impact on your day-to-day operations, your employees, and the success of your business. DTN is here to help with WeatherSentry Construction Edition. Now you can see real-time weather information—including accurate forecasts, lightning detection, wet bulb globe forecasts, storm corridor information, and so much more—and even get alerts, all right on your phone. Making it easier than ever to make faster, more informed decisions that benefit your people and your profits alike.

### **This system allows you to:**

- Avoid weather-related work delays.
- Keep employees safe with ample warning when bad weather is approaching.
- Save time and money through more informed scheduling.
- Document project delays with historical weather data.

"WeatherSentry is an indispensable tool that allows us to make good mission-critical scheduling and logistic decisions for our employees, our customers—and ultimately our bottom line."

## WeatherSentry Construction Edition

### The information you need — when you need it.

Rain delays. Damaged equipment. Dangerously high temperatures. These things can all eat into your productivity and, ultimately, your bottom line. But with DTN's industry leading forecasts, you can better anticipate what's coming your way and schedule your work accordingly. And with daily forecasts 15 days out and hourly forecasts for the immediate 72 hours—tailored to your specific job site—you know you're working with the most current information available. So you can create the best possible plan for scheduling and managing your teams to minimize risk and maximize your productivity and your profits.

### How it works

- The system provides daily forecasts for 15 days and hourly forecasts for the immediate 72 hours for your specific job site.
- Forecasts are updated hourly, ensuring you have the most up-to-date information.
- Information is displayed in a fully customizable view that lets you track radar, storm corridors, wind, and lightning, including what time they'll be passing through your site.
- Patented alerting technology keeps you abreast of potentially hazardous situations.
- Use OnDemand to consult one of our experienced meteorologists online or via the app and have your questions answered in minutes.

### The game-changing features

- A single dashboard and multiple layers for comprehensive weather intelligence.
- Patented, location-specific alerts that can be customized over 50 parameters and ranked in order of importance to you.
- Patented PrecipTimer® tells you when rain will start and how long it's expected to last.

### The DTN advantage

- We have been independently ranked the most accurate weather forecast provider 10 years in a row.
- We are a member of Weather Ready Nation.
- We offer an industry leading decision support system, including patented alerting.
