

Gain a competitive edge.

In the \$518 billion refined fuels industry, massive amounts of supplier pricing information flow quickly. At that pace, even a small company has a lot to lose from communication mistakes or inefficiencies. How do you cost effectively, quickly, and reliably move information? How do you ensure the information is formatted properly to aid in processing and avoid costly errors?

DTN DataConnect Messaging facilitates the electronic transfer of all the documents your customers need. Examples include rack prices, credit memos, invoices, EFT draft notifications, bills of lading, freight invoices, and more. Here are some ways the system can translate into a competitive edge for you:

- It offers one centralized drop point for all documents you need to deliver.
- There's one file format for you to maintain, regardless of the multiple formats your customers might require.
- A wide variety of delivery methods is available, such as DTN DataConnect, fax or email.
- It eliminates time and handling of re-sends if customers fail to receive information.

Your customers also could realize a competitive edge:

- They have one centralized pick-up location for all their documents.
- Documents can be integrated directly with their back-office software systems. This speeds up processes like accounts receivable, customer service, and more.
- It eliminates costly paper handling and significant amounts of information entry by staff. This translates to saving time, minimizing errors, and making your business more profitable.

"Phone calls from dealers looking to reconcile their account have dropped substantially. I now have more time to focus on providing great customer service. After all, that's what has kept us in business all these years."

DTN DataConnect Messaging

By streamlining the entire process, DTN DataConnect Messaging helps you and your customers grow business operations without adding new staff.

Records management in any format, at any time.

The ability to handle and manage electronic records is absolutely vital to your business, so we've designed DTN DataConnect Messaging to treat them with the appropriate level of care regardless of format. Hosted at our state-of-the-art data center, DTN provides secure, experienced service to outsource your communications needs. Documents can be sent/received in a variety of formats, with plenty of options for receivers as well.

The system also supports your hard copy documentation requirements. Standard printing automatically prints every document as soon as it becomes available, or enhanced printing allows you to choose which types of documents to print and when. Any document can be manually printed as needed. Also, if documents become available when you are not logged in, they queue so the system catches up when you return.
