

## Enhance pricing strategies and risk management

Get an edge in the grain markets with DTN Grain Price Averages, part of DTN ProphetX®. With this exclusive content, you can easily monitor aggregate basis and spot prices for any U.S. county or region.

Access, chart, and download corn, soybean, and milo data into Excel®.

View the data by city, county, state, region, or USDA region.

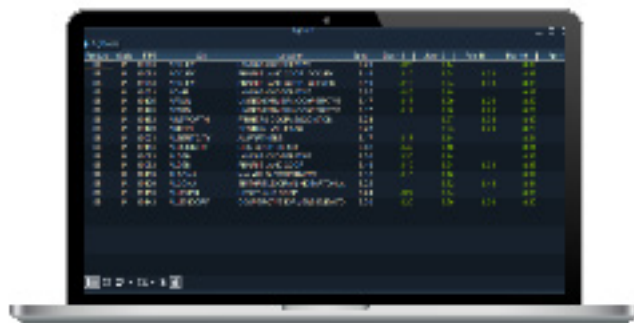

Select, sort, and customize the data based on your choice of parameters.

Search grain elevators by county, FIPS code, or within a specified mile-radius.

Toggle between cash prices and basis prices.

See 12 months of forward deferred bids from the current date, and search up to five years of historical data.

Easily perform and compare smart and straight average basis calculations.

See spot vs. actual prices

DTN Grain Price Averages are fed by our industry-leading cash bid database, which is updated twice daily and features more than 4,200 locations. It's the same data that the exchanges use for benchmarking.
