

Confidently make the right call

OnGuard siren hardware

Beacon light

Flashes red or yellow, based on alert type, to warn people of approaching lightning or severe weather.

Siren

Includes three mounted, adjustable sirens per unit.

Junction box

Connects the sirens and beacon to the siren interface box.

Pole

Standard 2-3/8-inch pole for mounting (optional).

Siren interface box

Connects the siren junction and DTN communication boxes.

Communication box

AC and DC capable, includes the main router, communication system, and battery-powered back-up.

Power cord

A standard three-prong, 120-volt power cord that works with any standard U.S. outlet.

Roof mount

An optional roof mount featuring an 8-foot tall, 2-3/8-inch diameter pole.
