

The DTN logo is positioned on the left side of the page, enclosed within a white circle that has a green border. The letters 'DTN' are in a bold, black, sans-serif font, with a small green circle above the 'n'.

**DTN**

## DTN ProphetX for Energy Traders

The top half of the page features a background image of a hand holding a blue pen, pointing at a digital data chart. The chart displays multiple colorful lines (red, green, blue, yellow) on a grid, with a dashed white line indicating a trend. The background is a blurred blue and green, suggesting a trading environment.

# Better data and more powerful analytics

Smart energy trades are about timing and insight. They never happen without real-time intelligence that reinforces buy and sell instincts. In today's challenging marketplace, it's more critical than ever that these decisions pay off.

When they need the most comprehensive actionable insights on the market to help them compete against the biggest and the best, savvy traders use DTN ProphetX®. It's an easy-to-use, powerful solution with an industry-leading array of proprietary information, innovative productivity features, advanced analytics, and performance.

Until now, you've had to choose between tools that are either too simple to provide truly useful information and insight or too cumbersome to keep pace with fast-moving markets. DTN ProphetX delivers on all fronts, providing exceptional power, reliability, risk management, and value.

- Proprietary rack price information and weighted degree day data offer advanced, unmatched insights and analysis compiled and delivered from algorithms, first-hand interviews, and more.
- Its information and analysis are supplemented with one-click access to charts of Greeks, implied volatility, volume, and open interest. Content from top-name third-party sources, as well as all U.S. commodities and several key international exchanges, are all included.
- Powerful forward curve and seasonal charts can help you see how prices are trending so you can plan ahead for the long term.
- Customized price alerts enable faster responses in periods of volatility.
- Connects you to extensive third-party and proprietary DTN<sup>®</sup> data — including DTN and OPIS racks, DTN Fuel Buyer<sup>®</sup>, DTN Fuel Seller<sup>™</sup>, Platts, Argus, exchange, and weather data.

### Efficient viewing, action, and execution

The solution's feature-rich interface eliminates repetitive tasks, makes it easier than ever to view and analyze information, and it can help you save time and money. Here's how:

- Because it's desktop-based, it's intuitive to navigate and use.
- It also provides anytime, anywhere access to critical market information via Android and iOS apps.
- Connects you to all relevant information for a particular commodity or market in one click, and you can navigate between industry-specific displays, quote sheets, charts, and news indexes.
- The extensive "drag and drop" capabilities and keyboard shortcuts help you create new displays from existing information, including spread displays, chart overlays, or a news search filter from a list of symbols in a quote display.
- Execute and process orders with an integrated DOM trader and ticket interface.
- Create spreadsheets with live market data to help you make better trading decisions.
- More quickly respond to changing energy demands by accessing price and weather data on a single platform.

**“DTN ProphetX  
does what  
it’s supposed  
to do — it  
helps me make  
split-second  
decisions  
every day.”**
