Print ad sizes

Ad sizes (including trim)

Full page	8" x 10.5"	1/2 horizontal	8" x 5.4"
Spread	16" x 10.5"	1/3 square (non-bleed)	4.625" x 5"
1/3 vertical	2.95" x 10.5"	1/3 square (bleed)	5" x 5.25"
2/3 vertical	5.25" x 10.5"	Jr. page (non-bleed)	4.75" x 7"
1/2 vertical	4" x 10.5"	Jr. page (bleed)	5.175" x 7.25"

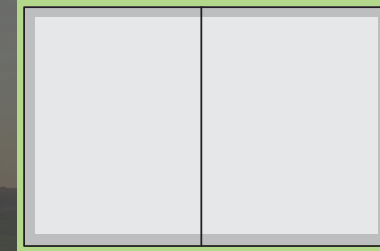

FULL PAGE

Trim size: 8" x 10.5"

- Add 0.125" bleed on all sides
- Keep important text and graphics 0.375" from the trim

SPREAD

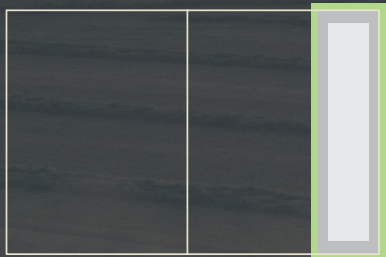

Trim size: 16" x 10.5"

- Add 0.125" bleed on all sides
- Keep important text and graphics 0.375" from the trim

Design Tips:

- Set your document to the designated trim size and include a 0.125" bleed on all sides.
- For best results, build crop marks at least 0.125" away from trim.
- Keep important text and graphics 0.375" from the trim.

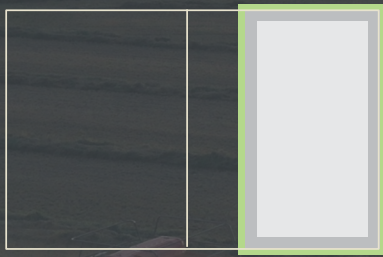

1/3 PAGE VERTICAL

Trim size: 2.95" x 10.5"

- Add 0.125" bleed on all sides
- Keep important text and graphics 0.375" from the trim

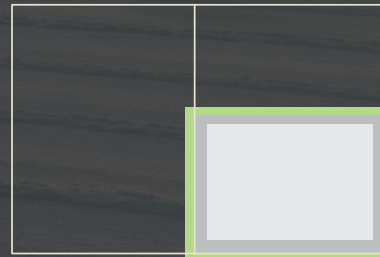

2/3 PAGE VERTICAL

Trim size: 5.25" x 10.5"

- Add 0.125" bleed on all sides
- Keep important text and graphics 0.375" from the trim

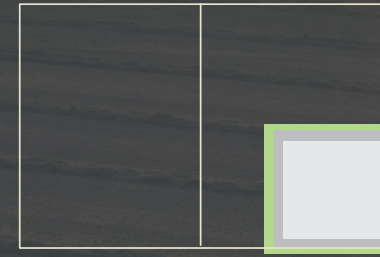

1/2 PAGE HORIZONTAL

Trim size: 8" x 5.4"

- Add 0.125" bleed on all sides
- Keep important text and graphics 0.375" from the trim

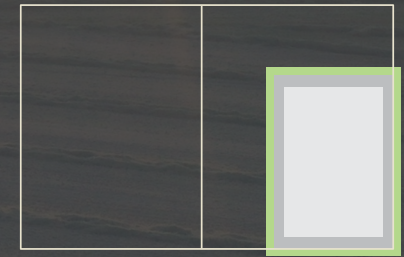

1/3 PAGE SQUARE

Non-bleed ad trim size: 4.625" x 5"
Ad with bleed trim size: 5" x 5.25"

- Add 0.125" bleed on all sides
- Keep important text and graphics 0.375" from the trim

JUNIOR PAGE

Non-bleed ad trim size: 4.75" x 7"
Ad with bleed trim size: 5.175" x 7.25"

- Add 0.125" bleed on all sides
- Keep important text and graphics 0.375" from the trim

PRINT SPECIFICATIONS

Printing Material Requirements

Specifications for Web Offset Publications (SWOP) will apply. No proofs of advertising copy to be set by the publisher will be submitted for the advertiser's approval or correction unless copy, layout, and other necessary printing material is received by Progressive Farmer in Birmingham, Alabama, on or before closing date.

NOTE: we advise against crossing the "gutter" in two-page facing ads with either lettering or design that requires near-perfect alignment, as alignment cannot be guaranteed in all copies, due to mechanical variations in manufacture.

Minimum Depth ROP Advertisements

One column: 14 lines.

Two columns: 28 lines.

*One and two-column ads **exceeding 112 lines** in depth must be full-column depth.

*Three-column advertisements must be full-column depth, except horizontal half page.

Copy change charges per page: \$1,000

Agency commissions and charges: agency commission is 15 percent.

Digital Specifications

Media

- Desktop applications (e.g. Quark Xpress) saved as PDF/x1a (Distilled from Postscript)
- Laserwriter or AdobePS driver and DDAPv3 PPD should be used when saving a Postscript file
- Only one ad per file
- All high-resolution images and fonts must be included when the Postscript file is saved
- We recommend the use of Type 1 fonts — no font substitutions are allowed
- Images must be SWOP (CMYK or grayscale) and saved in TIFF or EPS format at 300 dpi
- Total area density should not exceed SWOP standard 300 percent TAC
- Images should be CMYK or grayscale only
- Do not nest EPS files into other EPS files
- Do not embed ICC profiles within images
- Do not embed OPI information in files
- All required image trapping will be included in the file
- File must be right reading, portrait mode, 100 percent, with no rotations

Mechanical Specs

Web offset	
Saddle stitched (guides to foot)	
Depth of columns:	140 agate lines or 10 inches
Three columns to the page:	420 agate lines
Page type space:	7" wide x 10" deep
Trim size:	8" wide x 10.5" deep
Final foot, top, and outside trim:	0.125"

PRINT SPECIFICATIONS

All spot colors not intended to print must be converted to CMYK

Document construction: Build pages to trim and extend bleed 1/8” beyond document page

Proofs

All off-press proofs must include a SWOP approved color bar

Proofs made using digital proofing systems should use a digital control bar similar to the hard-dot film control bar with the following characteristics: screened areas with rulings of 33 lines per inch with tint values of 25, 50, and 75 percent of each of the primary colors in physical proximity to a solid patch

Two-color overprints of the same 25, 50, 75 percent, and solids are recommended

Additional areas such as 1 percent, 2 percent, 3 percent, 5 percent and 95 percent, 97 percent, 98 percent, 99 percent may be useful, especially for digital output

Additional areas such as 1 percent, 2 percent, 3 percent, 5 percent and 95 percent, 97 percent, 98 percent, 99 percent may be useful, especially for digital output

A gray balance bar must be included on the proof, designed to match the neutral appearance and weight of black tints of three different values, under standard viewing conditions.

The three-color gray balance portion of the bar should have the following values:

gray balance; black, 75, 50, 25 percent; cyan, 75, 50, 25 percent; magenta, 63, 40, 16 percent; yellow, 63, 40, 16 percent.

This color bar could take the form of a manufacturer’s color control guide, a GCA/GATF Proof Comparator, or a GATF/SWOP Proofing Bar or their digital equivalents. An exposure control element may also be included where appropriate.

A Digital Proofing Control Bar, provided by the manufacturer, obtained from SWOP, Inc. or created in-house, must be included on all proofs, in order for them to be considered acceptable SWOP proofs. This bar should contain all the elements as described above. Gray balance should appear neutral and similar to that of a SWOP press proof, and the substrate should appear similar in hue and brightness to Textweb Proofing Paper.

Digital color bars should meet all requirements for color bars contained herein. SWOP has made color bars meeting the above requirements available as a free download in two different formats: <http://www.swop.org/downloads.html>.

SWOP proof charges: should an advertiser send a proof that does not meet acceptable SWOP standards, a \$100 production charge will be added to the invoice to cover the costs associated with generating a contract proof.

A full array of standard preprinted inserts, gatefolds, and other special units are offered by special arrangement. All business reply cards must be checked by our production department to ensure that postal regulations have been met.

Click Tracking can be achieved by using click tag URL as landing page URL	

DIGITAL SPECIFICATIONS

1st Party Data eBlasts

- HTML provided by advertiser or 600x800 jpeg or gif Static Ad
- 200KB max for all hosted images
- Subject line provided by advertiser. Do not use any special characters in the subject line as it will not render correctly in all email platforms.

HTML Best Practices	Text Part rules to Respect
Use HTML and not XHTML.	Defining a text section guarantees that all of your recipients will be able to read your e-mail, as some tools open in text mode. In addition, a Multipart message (HTML Version + Text Version) facilitates delivery into inbox (which is the way Campaign Commander sends emails).
DOCTYPE is mandatory	
Test your code according to W3C standards with: http://validator.w3.org . It is very important to be compliant with them. The World Wide Web Consortium (W3C) is an international community that develops open standards of the Web and they are always followed by the ISPs.	
Use tables for positioning.	
Use a maximum width of 600 or 650 pixels.	
Respect the ratio of approximately 50% TEXT and 50% IMAGES.	
Do not use links to external CSS.	
Do not position items with : Margin, Padding, CSS, ...	
Avoid embedding tables as much as possible (it causes display problems in certain browsers).	
Do not use JavaScript (it is blocked).	
Do not use background images applied to the whole area (these are often blocked).	
Do not use a single image in the body (it can trigger spam filters).	
Avoid the EMBED tag, which enables media to be read (it is blocked sometimes).	
Avoid FORM tags, which are likely not to send anything to the database (and sometimes they are not even displayed in the email).	
Very long lines of code (more than 1000 characters) trigger anti-spam filters.	
Long lines of numbers in disclaimers (bank accounts, long number of codes for example or others) trigger anti-spam filters.
