

Who is DTN

Smarter, faster decisions – for the industries that feed, fuel, and protect the world.

DTN is a global data and technology company that equips operational leaders with the decision speed and intelligence needed to outpace uncertainty.

DTN is built for energy teams managing refined fuel pricing and distribution; agriculture companies engaging producers, managing supply chains, and driving sustainability; and weather-sensitive sectors like aviation, logistics, and utilities that require real-time, risk-based decisions.

Our Operational Decisioning Platform transforms complex, multi-source data into decision-grade insights—empowering customers to expand margins, accelerate growth, and manage risk with confidence.

Market Dynamics: The Era of Constraint and the Rise of Decisioning at Scale

Navigating disruption demands a new approach to decision-making.

Industrial businesses are under unrelenting pressure. Energy transitions, financial tightening, geopolitical volatility, and extreme weather are transforming markets faster than most companies can adapt. The result: shrinking margins, stalled growth, rising risk—and legacy systems that can't keep up.

In this new era of constraint, success no longer comes from scaling assets—it comes from scaling better decisions. To stay competitive, companies must move beyond siloed automation and static processes, embracing agile, insight-driven operations across complex ecosystems.

In fact, 42% of CEOs believe their companies won't survive the next decade without stronger decision-making.

This shift is widening a competitive divide: leaders are pivoting from asset-heavy models to decision-first strategies, driven by operational dexterity, AI-powered foresight, and the ability to act in minutes—not weeks.

That's where DTN comes in.

What We Offer

Purpose-built platforms. Real-world results.

DTN delivers a new class of technology platform purpose-built for today's operational challenges. The DTN Operational Decisioning Platform uniquely combines vertical industry hubs, proprietary Decision-Grade Data, and operational AI to drive smarter, faster decisioning at scale.

The DTN Operational Decisioning Platform is built on deep vertical expertise, with hubs tailored to the distinct needs of energy, agriculture, and weather-driven operations. Each hub delivers Decision-Grade Data, decisioning tools, and AI models designed for the realities of that sector—enabling faster, more confident action in moments that matter.

DTN Fuel Operations Hub

Trusted by 85% of the U.S. downstream refined fuel market, the DTN Fuel Operations Hub connects every critical touchpoint across the supply chain—from terminals and suppliers to buyers and logistics. It delivers micro-moment visibility into market shifts, normalizes fragmented data sets, and enables real-time pricing, forecasting, and dispute resolution. The result is faster, more profitable decisions powered by closed-loop intelligence.

DTN Ag Hub

With insights covering 95% of U.S. farms, the DTN Ag Hub provides unmatched visibility across the agricultural ecosystem—from input providers and producers to traders and food companies. It combines decades of agronomic, weather, and market data with advanced analytics and AI to deliver a "digital twin" of farming—empowering smarter planning, sustainability tracking, and commercial engagement.

DTN Weather Hub

The DTN Weather Hub powers sector-specific planning with a combination of data and insights for aviation, utilities, logistics, and more. Backed by real-time global sensor data and 180+ meteorologists, the platform delivers ultra-granular forecasts, impact assessments, and compliance reporting. It helps businesses anticipate and respond to weather risk with speed and precision—turning uncertainty into a competitive advantage.

What Makes Us Different

A platform built differently—because so are your operations.

Purpose-Built Vertical Hubs

Domain-specific platforms built on decades of embedded expertise, delivering the visibility and workflows your operations actually run on.

Decision-Grade Data

The industry's only Decision-Grade Data—proprietary, multi-source, and governed for real-time operational use. Granular, normalized, AI-ready data empowers precise decisions when timing and accuracy matter most.

Ecosystem Trust and Neutrality

As a neutral and trusted ecosystem intermediary, DTN offers unbiased insight and transparent governance—with no competing interests. You can rely on us to steward your data and deliver insight with integrity—no agendas, just outcomes.

Together, these make DTN the global leader in operational decisioning—empowering the companies that feed, fuel, and protect the world.

The DTN logo is positioned on the right side of the slide, enclosed within a large, thin blue circular arc. The letters "DTN" are in a bold, black, sans-serif font, followed by a small blue circle with a white dot in the center, resembling a stylized globe or a data point.The website URL "www.dtn.com" is displayed in a white, sans-serif font inside a green rounded rectangular button. The button is located in the lower-left quadrant of the slide, overlapping a dark, abstract background image that features a network of glowing orange and blue lines and dots, suggesting a global or technological theme.
