

# DTN Weather Hub for Public Safety

## When minutes matter, protect every community with confidence.

### The challenge

When a tornado touches down at 3 a.m. or flash floods threaten evacuation routes, emergency managers have only minutes to coordinate a multi-agency response for hundreds of thousands of residents. One missed warning, one delayed evacuation order, or one communication breakdown can cost lives and erode public trust.

### The solution: DTN Weather Hub

DTN Weather Hub gives public safety leaders the foresight and speed to protect their communities. With Decision-Grade Data, agencies gain real-time threat monitoring, integrated coordination tools, and defensible records to support confident, life-saving action.

## From detection to action in minutes

### Detect

Hyperlocal forecasts and real-time tracking of tornadoes, floods, wildfires, and extreme winds.

### Decide

Role-based dashboards give incident commanders and EOC staff the right data instantly.

### Act

Automated targeted alerts and communication tools keep every agency and resident aligned.

## Why leaders trust DTN Weather Hub

Emergency managers need more than forecasts. They need intelligence they can act on. DTN delivers the clarity, documentation, and coordination tools agencies depend on to safeguard residents.

Key benefits include:

- Faster targeted alerts, detection and response that can be coordinated across jurisdictions
- Multi-agency or role specific dashboards unified from a single source of truth
- Defensible documentation for liability protection and FEMA claims
- Optimized resource deployment with precision threat assessment
- Seamless integration with existing EOC systems
- Backed by 180+ meteorologists and decades of severe weather expertise

## Key capabilities at-a-glance

- Incident command map to monitor assets, shelters, and routes
- Protocol-driven alerts matched to emergency plans
- Comprehensive peril tracking for severe winter weather and more
- Asset management for critical facilities and infrastructure
- Field-ready mobile app for alerts and coordination anywhere

### Optional add-ons:

- [OnGuard Siren Alerting Solution](#) for outdoor public warnings
- [Risk Communicator](#) with 24/7 meteorologist support

# Lead with confidence, powered by Decision-Grade Data

Unlike standard weather services, DTN Weather Hub is purpose-built for emergency management. It provides the intelligence, documentation, and speed agencies need to make confident decisions, protect residents, and preserve public trust.
